Sprint 1 Review -Team 42

Expectations

1. Completed use-cases covering broad use of the system.

   Comments: Use cases are well thought about. Covers the system well.

2. Created UML covering the system.

   Comments: The UML diagram was good well thought off and they also had a sequence diagram

3. Version$_0$ project created in team repository, being worked by team following software dev standards, and deployed to AWS using Jenkins.

   Comments: Version 0 was up and running on AWS with Jenkins integration working well.

4. Demonstrated use of Jira.

   Comments: Backlog had 27 tasks. Had prioritized them well demonstrated good knowledge of Jira.

Grade: A
